

POTASSIUM COCOATE

SAPONIFIED COCONUT OIL

DESCRIPTION:

Sanitek's Potassium Cocoate, also known as 40% Coconut Oil Soap, is processed from 100% pure natural coconut oil. Soaps made from coconut oil produce the most copious lather of all the animal and vegetable oil soaps. Because Sanitek uses only whole coconut oil, rather than fatty acid extracts, the 12% natural glycerin found in the oil is retained. This adds emollient and moisturizing qualities lacking in fatty acid soaps.

The foaming properties and feel of synthetic shampoos may be improved by adding 10-25% coconut oil soap.

Sanitek's Potassium Cocoate contains no dyes, perfumes or fillers.

As with all of Sanitek's products, Potassium Cocoate is subjected to strict quality control tests to insure batch uniformity before being released for sale.
